Biographical sketch

Dr. Ver Steeg's research explores *practical methods for inferring meaningful structure in complex systems*. This work draws on a diverse set of connections between machine learning, information theory, causal inference, and physics. His recent work has applied these tools to solving outstanding problems in diverse domains including biology, natural language, and human behavior.

Education

Ph.D., California Institute of Technology — 2009
Field: Physics, Area: Quantum Information and Computation
Advisor: John Preskill, Feynman Professor of Theoretical Physics

B.S., Drake University — 2003
Majors: Physics, Mathematics, Philosophy

Experience

University of California, Riverside
Computer Science & Engineering,
Associate Professor (IV) — 2023 - Present

University of Southern California
Computer Science Department,
Adjunct Research Associate Professor — 2023 - Present
Research Associate Professor — 2019 - 2022
Research Assistant Professor — 2013 - 2019
Information Sciences Institute,
Senior Research Lead — 2018 - 2022
Research Lead — 2015 - 2018
Computer scientist — 2011 - 2015
Postdoctoral researcher — 2009 - 2011
USC Norris Comprehensive Cancer Center,
Full member — 2022 - Present

Amazon
Visiting Academic — 2021 - Present

ZEFR
Scientific advisor — 2019 - 2021

California Institute of Technology — 2003-2009
Graduate research

Summer internships
    Google Inc., Machine translation   2009
    Brookhaven National Laboratory, Nuclear physics   2002
    Los Alamos National Laboratory, Nuclear physics   2001

Drake University   2001-2003
    Computational atomic physics research

Recent Sponsored Research

ISI Exploratory Research Award. "FairPRS: Fairly Predicting Genetic Risk Scores for Personalized Medicine"   2021-2022

Keck Foundation COVID Fund."Model-based immuno-phenotype mapping to investigate signatures of immune response and disease severity in SARS-CoV-2 infection to inform precision medicine based therapeutic strategies"   2021

DARPA Reversible Quantum Machine Learning and Simulation Program   2021

DARPA NEED Program   2021

DARPA Cooperative Secure Learning   2020-2022

DARPA Learning with Less Labels   2019-2023

Amazon Research Award   2019

Keston Foundation Research Award   2018

James H. Zumberge Research and Innovation Fund Award   2017

DARPA Next Generation Social Science   2016-2020

DARPA Social Media in Strategic Communication grant   2012-2016
    "Situational Awareness for Social Media: Theories, Models and Algorithms"

AFOSR Young Investigator Award, "Bell Inequalities for Complex Networks"   2012-2015

Army Research Office, "Optimization via Open System Quantum Annealing"   2012-2015

Awards

Best Paper Award, NeurIPS Deep Learning through Information Geometry Workshop   2020

Amazon Research Award   2019

ISI Institute Achievement Award   2018

IJCAI Early Career Spotlight   2017

AFOSR Young Investigator Award   2012-2015

Best paper runner-up at UAI   2011

National Science Foundation Graduate Research Fellowship   2005-2008

California Institute of Technology Richard Feynman Fellowship   2003

Barry Goldwater Scholarship   2002

Drake University Physics Scholarship   1999-2003

Teaching and mentoring

Advising or co-advising

PhD students

Robert Brekelmans (postdoc fellowship at Vector Institute)	2022
Sami Abu-al-haija (Google Research)	2022
Daniel Moyer (postdoc at MIT CSAIL, now Assistant Prof at Vanderbilt)	2019
Shuyang Gao, PhD (previously Amazon, now at an AI startup)	2018
David Kale, PhD (previously Netflix, now at an AI startup)	2018
Umang Gupta	Expected 2023
Hrayr Harutyunyan	Expected 2023
Neal Lawton	
Kyle Reing	
Myrl Marmarelis	

Teaching

CS 229, Advanced Machine Learning, UCR   Spring 2023

CSCI-699 (Advanced Special Topics): Dynamics of Representation Learning, USC   Spring 2022

Designed a new course looking at different aspects of learning (optimization dynamics, models defined via dynamics, distribution shift) using tools from classical physics and non-equilibrium thermodynamics. Draft syllabus available at `https://sites.google.com/view/699dynamicsofrep/home`. 11/11 students evaluations rated my teaching as "excellent" (the highest score), with several students commenting that it was the best or most helpful graduate course they had taken.

CSCI-699 (Advanced Special Topics): Representation Learning: Theory and Practice, USC   Fall 2019

Designed and taught with Aram Galstyan and Sami Abu-El-Haija a course focusing on principles and practical aspects behind successful deep learning. Over 50 PhD students took the class. 44/45 student evaluations rated my teaching as "excellent" (the highest score). Syllabus available at `http://sami.haija.org/cs699/`.

CSCI-590: Directed research, USC   2014- Present

CSCI-599: Physics and Computation, USC   Spring 2012

Designed and taught with Aram Galstyan. Studied connections between theoretical computer science and machine learning, statistical physics of disordered systems, and information theory. Main text was Mezard and Montanari,"Information, Physics, and Computation". First course to ever program and run a quantum annealing computer for a course project (USC was the first university to purchase a D-Wave computer). Two class projects led to publications.

T.A. Physics 2, California Institute of Technology   2008

Note: these papers span different disciplines including physics, computer science, and biology. Listed are all peer-reviewed publications including journal articles and conference proceedings. In physics, conferences typically do not have papers (only abstracts, not included here). Peer reviewed conference proceedings in CS and biology are included. In CS, conference proceedings are, depending on the conference, highly selective and considered top venues in the field (e.g., NeurIPS/NIPS, ICML, WWW, ICLR, CVPR). Journals in CS are typically used for longer version of work appearing originally in conferences. In neuroscience, conference papers are peer reviewed, but they are short and generally regarded as second tier publications mainly used for work in progress.

Recent Invited Talks

ITA Workshop	2023
UCR Data Science Seminar	2023
USC AI4Health Workshop	2022
Keynote invite for the AAAI-22 workshop on Information Theory for Deep Learning (declined)	2022
Amazon Machine Learning Conference	2021
Amazon Caltech Tech Talk	2019
Beyond Shannon Workshop at IAS Amsterdam	2019
UCSB Kavli Institute for Theoretical Physics, At the Crossroad of Physics and ML	2019
Santa Fe Institute	2018
Physics and Machine Learning Conference at Los Alamos	2018
Allerton Conference	2017
Berkeley DataEDGE conference	2017
Los Alamos National Lab.	2017
IJCAI Early Career Spotlight talk	2017
ITA Workshop	2017
Vicarious	2016
*W.V.T. Rusch Engineering Honors Colloquium	2016
Headspace	2016

Deep learning for health care workshop at MLHC	2016
StatPhys26 Workshop: Statistical physics methods in biology and computer science	2016
IPAM Cultural Analytics workshop	2016
ITA Workshop	2016
UCLA, Soatto group seminar	2016
UC Davis, Crutchfield group seminar	2016
Caltech, IST Seminar	2015
UC San Diego, AI seminar	2015
OpenX	2015
Brain Corporation	2015
*1st Collaborative Data Science Symposium hosted by Ameritrade	2015
Joint Symposium on Neural Computation at USC	2015
Machine Learning LA at eHarmony	2015
Information Theory and Applications Workshop	2015
*AFRL Rome, "Distinguished Speaker Seminar Series in Machine Intelligence and Autonomy"	2014
Santa Fe Institute, workshop on "Statistical Mechanics of Complexity"	2014
IPAM Mathematics of Social Learning Workshop	2014
ISI, Natural Language Seminar	2013
ID Analytics, "Information-Theoretic Tools for Social Media"	2013
Santa Fe Institute, workshop on "Structure, Statistical Inference and Dynamics in Networks"	2013
Sante Fe Institute, "Information-Theoretic Tools for Social Media"	2012
Keynote for "Making Sense of Microposts" workshop at WWW 2012.	2012
SAP Research, Singapore	2012
LARC, Singapore Management University seminar.	2012
UC Irvine, AI-ML seminar.	2012

* *Talks with honorarium*
